

North West Olympiads Results

FEMSSISA produced Mathematics Olympiads for grades 1 – 7, Coding & Robotics for grades 4 – 7 and Technology for grades 8-9 for a select number of schools in the North West province.

Olympiads are a key test of problem-solving ability which not only tests your ability to tackle the unknown, but tests your ability in mathematics, the ability to comprehend and solve complex problems. We thank all schools who entered this year. Our Olympiads are grade specific and we hope for your continued support into the future and beyond.

B. Concluding Remarks

One of the most important objectives of an Olympiad is to identify talent. The performance in the 2024 Olympiads have shown encouraging results. Schools should not be disappointed if the results did not meet their expectations. They should rather see this as an opportunity to improve learners in the gaps identified.

The Foundation phase (Grade 1 – 3) with respect to Mathematics has well **as almost half the learners attained non-participation category status.**

The Mathematics Grade 4 -7 result is slightly behind other provinces however we expect this to correct itself this year with the second year of exposure to the Olympiad.

We also expect Coding & Robotics & Technology results to improve in 2025 with various interventions and better preparation.

C. Important Dates to Diarise:

Registration Opens: 15 January 2024

Registration Closes: 21 July 2025
